

SuiteMed™ IMS for OB / GYN

A fully integrated EHR / Practice Management solution specifically designed to meet the needs of Obstetrics and Gynecology

SuiteMed IMS OB/GYN EHR is integrated with a comprehensive practice management solution that's designed for the unique needs of Obstetricians and Gynecologists, enabling them to digitize every process in their practice including the gestational age, prenatal details, OB/GYN history, e-prescribing, connection with labs for order and results management, physical exams, ultrasound and image integration.

Obstetrics and Gynecology Templates and Workflow

SuiteMed IMS will streamline the entire documentation and patient charting process with our robust Obstetric and Gynecologic conditions- and symptoms-based templates which come pre-loaded and include templates for Abdominal Mass, Abnormal Vaginal Discharge, Amenorrhea, Birth Control, Dysmenorrhea, Dyspareunia, Menorrhagia, and more. The template editor lets practices customize and add templates to suit individual preferences, allowing physicians to work as their particular practice and personal preferences demand. Templates feature intuitive pick-lists, and checkboxes to simplify documentation encouraging chart completion.

This fully integrated electronic health records (EHR) and practice management (PM) solution is ideal for the OB/GYN practice, connecting them to patients, payers, medical devices, pharmacies, labs and other health care entities regardless of the practice size, specialty and number of locations.

EHR Certified

ONC-ATCB Certified 2011/2012 Complete EHR

SuiteMed IMS EHR v.14 is 2011/2012 compliant and has been certified by the Certification Commission for Health Information Technology (CCHIT®), an ONC-ATCB, in accordance with the applicable certification criteria for Eligible Providers adopted by the Secretary of Health and Human Services. **This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments.**

(9/30/2010; CC-1112-372910-1; NQF 0421, NQF 0013, NQF 0028, NQF 0041, NQF 0024, NQF 0038, NQF 0059, NQF 0064, and NQF 0061; Sybase SQL Anywhere 9.0.2 for 170.302(s), Sybase PowerBuilder Cryptography Library, Chilkat 3rd party Encryption Library for 170.302(u) and 170.302(v), and Internally Developed Patient Portal for 170.304(g))

SuiteMed IMS for Obstetricians & Gynecologists

- Simplify patient visits with OB/GYN-specific templates for faster, more comprehensive documentation, storage and retrieval of detailed patient data.
- Enhance workflow with a paperless office. Gain better communications, greater efficiency and deliver better patient care.
- Improve overall revenue with accelerated reimbursement, automatic coding recommendations, decreased denials and increased patient flow.
- Built-in reporting tools scrutinize your practice's patterns for pay-for-performance, meaningful use requirements, quality measurements and business analysis.
- Access patient information at the point of care, no more chart-pulls and no more misplaced records.
- Eliminate redundant paperwork, enable patients to complete forms with patient portal and in-office kiosk.
- Achieve interoperability and connectivity with other health care entities, pharmacies and labs for referrals, orders and results.
- Local ongoing support from a national team of industry experts -- SuiteMed Authorized Partners, dedicated to serving the needs and interests of Obstetricians and Gynecologists.
- Automate prescription writing, drug interaction and formulary checking with automatic alerts, and a fully-integrated drug database.
- Easily deliver patient education materials for OB/GYN-specific tests, procedures, and disease management.

“ We chose SuiteMed’s IMS and only after a few months of using it, we were convinced that it is the best EHR system on the market. It is a true integrated solution for our practice that has allowed us to become more efficient without the headaches of interfaces. ”

Pre-loaded, customizable procedural templates specific to Obstetrics and Gynecology.

SuiteMed IMS Features for OB / GYN

• Procedural Templates Specific to Obstetrics & Gynecology

Pre-loaded, customizable procedural templates can improve documentation accuracy and patient care in addition to increasing efficiency. Examples include Colposcopic examination templates, Endometrial biopsy operative reports, LEEP procedure operative reports, and Pap Smears or Ultrasounds (OB).

• ICD Templates Specific to OB-GYN

Have all your suggested codes, RXs, and procedures automatically populate for you based on the selections you document for each patient.

• Obstetric Conditions- and Symptom-Based Templates

Documenting histories, complaints and other facets of the visit, diagnosis, and prognosis process couldn't be more simple and intuitive with SuiteMed's robust OB-GYN templates that come pre-loaded and ready to use. Plus they are a snap to customize.

• Breast and Axillary Conditions

Easily track and enter information such as abnormal mammogram, abnormal sonogram, axillary lump, axillary pain, breast lump, breast pain, family history of breast cancer, nipple discharge, personal history of breast cancer, benign breast disease, and more.

• Complete Obstetrics & Gynecologic Histories

View detailed histories for patients at any given time, accessed easily with a click.

• Screening Questionnaires

Acquire, track, and manage data from screening for each patient with ease. Examples include questionnaires for genetic screening, hormone screening, abuse screening, and contraceptive screening.

• Ante Partum Record

Post-partum records and gynecologic malignancy records can be kept and managed digitally for easy follow-up and management.

• Gynecologic Conditions - and Symptoms-Based Templates

Our robust gynecologic conditions- and symptoms-based templates come pre-loaded and include templates for Abdominal mass, Abnormal vaginal discharge, Amenorrhea, Birth Control, Dysmenorrhea, Dyspareunia, Menorrhagia, and more.

The SuiteMed Difference

SuiteMed's Ambulatory Electronic Health Record (EHR) and Practice Management software are fully integrated sharing a single database, to meet your unique clinical and administrative needs. Our solutions can be implemented as an integrated solution or separately as stand-alone applications and can be deployed as a client-server or web-hosted solution.

It takes more than just software to deliver success in today's complex practice. That's why SuiteMed ensures your success with local **Authorized Partners**, experienced in health IT and certified in our solutions.

SuiteMed Authorized Partners are with you all the way, from demonstrating SuiteMed IMS to implementation and beyond – your local ongoing single source solutions partner. As your Authorized Partner we're always available for fast on-site or phone support, training and personalized revenue improvement services so you can concentrate on practicing medicine not technology.

Why a Certified EHR?

To ensure that the system you select will allow you to qualify for Meaningful Use federal incentive payments, select a solution that is EHR Certified. Since there are few benchmark measures available to provide a level of confidence regarding specific EHR functions an EHR certification is very important.

The ONC-ATCB certification has been developed by the federal government to certify that an EHR system meets the technical requirements needed for a provider to become a meaningful user of an EHR system. The use of an ONC-ATCB certified product is required to receive any federal government incentive money for the use of an EHR system. The ONC-ATCB certification test script is very specific to EHR criteria that qualified providers must meet in order to participate in the government incentive program. There are two types of ONC-ATCB certifications; one for Complete EHRs and one for EHR Modules. A Complete EHR certification for Stage 1 Meaningful Use means that the EHR product has met all 33 criteria tested. Whereas an EHR Module certification means that the product meets at least one of the 33 criteria tested.
