## SuiteMed Products and Features

Intelligent Medical Software (PM & EHR)	Practice Management Only	Electronic Health Records Only
IMS	PM	EHR

<b>Scheduling</b>	Scheduler is an integral part of the practice management system and includes an array of features that will keep your office running smoothly, increase practice productivity, establish scheduling accountability, and provide optimum patient satisfaction.	✓	✓	
<b>Check-In &amp; Check Out</b> (Auto Check-In Kiosk Option Available)	Quickly and easily check-in patients and monitor daily activity from one screen. Addition options empower patients to check-in, update demographic data, complete electronic forms and more. Saving staff time, while improving efficiencies.	✓	✓	
<b>EMR (The Visit Note)</b>	Customize SOAP Sections per provider needs; easily create visit notes; add notes using Dragon Medical Transcription; e-Prescribe or print Rx's, labs, referrals, careplans, plans and follow-ups; create Super-bill; view Flow-sheets and Patient Dashboard; use Global Templates and/or copy prior patient visit information easily; PLUS MUCH MORE!	✓		✓
<b>Billing and Collections</b>	Streamline your billing with automated data entry from SuiteMed IMS EHR - generating Super Bills, strong validations, pre-checking of EM codes, CMS-1500 or UB92 claims, automatic reconciliation (ERA), enhanced collections and extensive reports to keep finances on track.	✓	✓	
<b>Authorization &amp; Referral Tracking</b>	Authorization verification is provided for check-in and charge posting to guarantee insurance reimbursements. Authorization requirements can be set by procedure and insurance.	✓	✓	
<b>E-Prescribing &amp; Prescriptions</b>	Track medication and refill histories with the flexible and comprehensive prescription/e-prescribing module. Prescriptions are automatically checked against a patient's medications and allergies before being electronically transmitted to the pharmacy to prevent interactions and errors.	✓		✓
<b>Lab Orders and Tracking</b> <small>*LabCorp &amp; Quest Integration Option Available</small>	Transfer diagnostic/lab orders electronically with an HL7 lab interface. Customized templates, pre-printed order forms and print/fax orders are handled with ease.	✓		✓
<b>Physician Dashboard "My Tasks"</b>	Single screen dashboard identifies tasks and reminders which will significantly improve staff workflow, maximizing your resource allocations and intra-office communications.	✓		✓
<b>Reporting</b>	Patient data is collected and securely stored, enabling the practice to generate detailed reports of outcome analytics, business analysis and comparative patient data. Hundreds of pre-built reports are included with an easy-to-use custom report writer. Dashboard reports are accessible for an overview.	✓	✓	✓
<b>Scanning, Document &amp; Image Management</b>	Printed documents and clinical images can be captured from outside sources, condensed and organized into the patient's chart electronically. Keep medical records accurate and up-to-date with a paperless environment.	✓	✓	✓
